

# METALU

*A Chahuter*

Large-scale creations and events

## About us

Métalu A Chahuter is a collective of multidisciplinary artists who have been creating theatrical and musical forms that are ludic and poetic (mostly participative and *in situ*) for more than 20 years. Universe makers, their know-how are closely related to the matter, to construction techniques, to mechanical or sometimes optical processes. As of today, the collective regroups 10 artists who rely on the complementarity aspects of their respective skills.

Métalu A Chahuter's artistic proposals go from solitary feats to monumental scenographies; from plastic or interactive installations to live performances; from *entresorts* to great urban parades.

On demand, Métalu A Chahuter mobilizes its teams skills in order to organize customised events, with specific artistic programs and creations.

This diversity allows us to work with numerous partners: in the public space, indoor or outside of the pre-assigned locations, in places that are equipped or not; as part of major events as well as of regular or punctual programs.

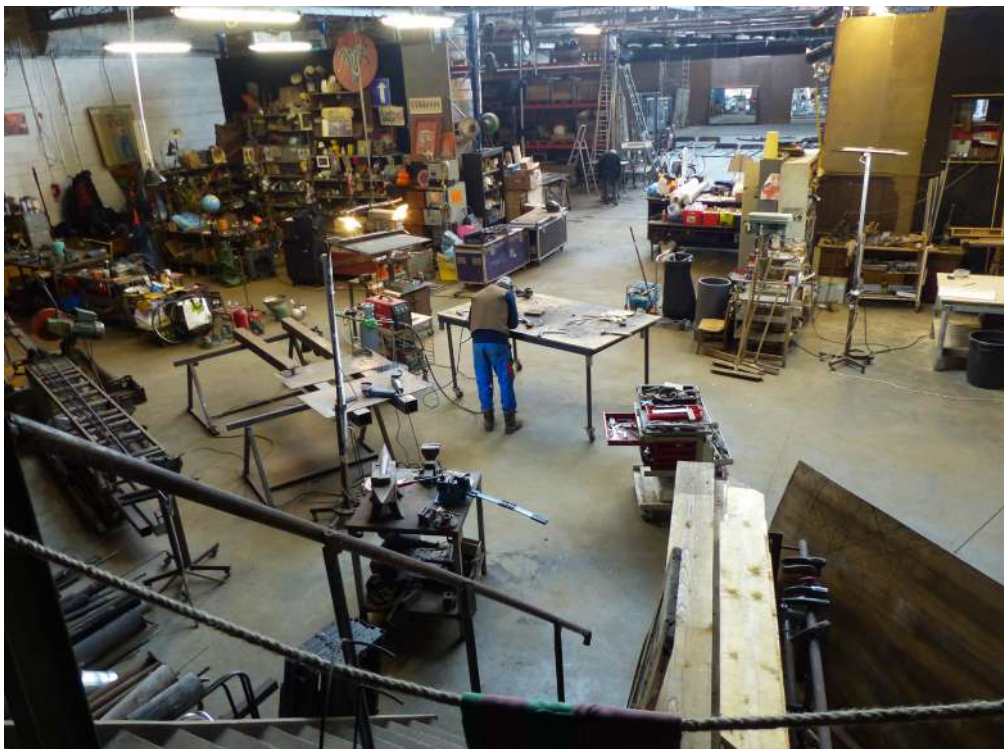

# Artistic Fabric

The collective owns a rehearsal space of almost 400 square meters in addition to a construction workshop, making it easy to do round trips between the set and the workshop and allowing the experimentations of these life-size artistic forms, before presenting them to the public.

Rehearsal set of 7 m. x 6 m

Construction workshop (wood/metal)
